Document Viewer App Best Practices 12

Introduction

The Document Viewer app, powered by Google Docs™ Viewer, allows you to display a document on a page on your end-user website without the worry of embedding and adjusting code within the Schoolwires editor. You add a Document Viewer app to your page, edit the app and **Browse** to locate the document that you wish to display.

Visitors to the end-user website use controls to manipulate how the document displays.

Working with the Document Viewer App

Once you have the document you wish to insert, you are ready to add a Document Viewer app to your page and insert the document into it. Once added, you can edit or remove the app from your page.

We recommend that you add a separate Document Viewer app for *each* document or object you wish to display.

Add an Document Viewer App to a Page

Here's how you add a Document Viewer app to a page.

1. In *Site Manager*, navigate to the workspace containing the page to which you wish to add a Document Viewer app.
2. Click Actions to the right of the page and select *Edit Page* from the drop-down list. The page opens in Edit mode.

3. In the Actions pane, click *Manage Apps & Layout*. The page opens in Design mode.

- Click **Add App**. The Available Apps dialog displays.

- Click **Document Viewer App**. The Add Document Viewer App dialog displays.

- Accept the default app name *Document Viewer App* or replace the text with a meaningful name.
- Click **Save**. You are returned to the page in Design mode.
- Click **I'm Done** to return to the page in Edit Mode.

You are now ready to edit the app and insert a document.

Edit an Document Viewer App on a Page

Here's how you edit and insert a document into a Document Viewer app on a page.

1. In *Site Manager*, navigate to the page containing the app you wish to edit.
2. Click **Actions** to the right of the page and select *Edit Page* from the drop-down list. The page opens in Edit mode.

3. Click on the app that you wish to edit. The edit dialog displays. Note that when you position the cursor on the app, the background color changes and a pencil displays.

4. Click **Browse** to select the document you wish to insert. You have the option to upload a file from your computer, select an existing file from your website, or select a shared file.

Note that if you use the *Upload File* option, a copy of the file is placed into the local Files & Folders. The local Files & Folder URL for the file is inserted into the *Document to display* field.

- Once you have selected the document you wish to insert, click **Insert File**.

The screenshot shows the 'Document Viewer App' configuration window. At the top, it says 'Select the document you wish to display on you website, then click Save.' Below this is a 'Document to display:' section with a text input field containing a URL: 'http://c2.tc.schoolwires.net/cms/lib/TC00000006/centricity/Dom:'. To the right of the input field is a 'Browse...' button. Below the input field, it states: 'Supported file types include: .DOC(X), .XLS(X), .PPT(X), .PDF, and .PAGES. Your document can be up to 2MB in size.' At the bottom left are 'Save' and 'Cancel' buttons. At the top right is an 'Options' button with a gear icon.

- Click **Save**.

Remove an Document Viewer App from a Page

Here's how you remove a Document Viewer app from a page.

- In *Site Manager*, navigate to the page containing the app you wish to edit.
- Click **Actions** to the right of the page and select *Edit Page* from the drop-down list. The page opens in Edit mode.
- In the Actions pane, click *Manage Apps & Layout*. The page opens in Design mode.

The screenshot shows the 'Math Tips and Practice Questions Page' in Design mode. The top header shows 'Smith, Anne' and 'Section Workspace'. Below this are tabs: 'Summary', 'Tools', 'Editors & Viewers', 'Statistics', and 'How do I...?'. The main content area shows the page title 'Math Tips and Practice Questions Page' and a message: 'You are in design mode. Organize your apps by dragging and dropping. Double-click the App to change the name.' Below this are 'Add App' and 'Change Layout' buttons. A 'Document Viewer App' is shown in a dashed box, and a blue circle highlights the 'X' icon in the top right corner of the app box. On the right side, there is an 'Actions' pane with options: 'Manage Apps & Layout', 'Page Options', 'Set Viewers', and 'View Page'. At the bottom right, there is a 'Pending Comments' section with a link to 'All Comments' and a message: 'There are no comments awaiting approval.'

- Position the cursor on the app you wish to remove. Note that the background color changes.
- Click the  icon to remove the app from the page. Note that the background color of the icon changes. A confirmation dialog displays.

- Click **Yes**. You are returned to the page in Design mode.

- Click **I'm Done** to return to the page in Edit Mode.

Permanently Delete an Document Viewer App

Here's how you permanently delete a Document Viewer app.

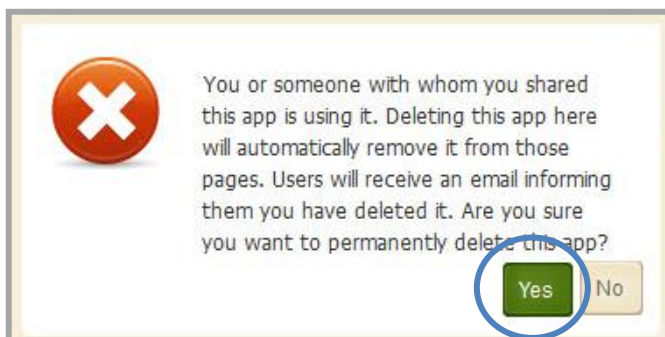

- In *Site Manager*, navigate to the workspace containing the page with the Document Viewer app that you wish to permanently delete.
- Click **Tools**. Available Tools for the workspace display.
- Click **App Manager**. The App Manager displays.

4. In the first column, select the type of the app that you wish to delete. In this instance, Document Viewer app. All apps of this type within the current workspace display in the second column.
5. Locate and click the name of the app you wish to delete. The app instance is highlighted.

6. In the third column, click **More** and select *Delete App* from the drop-down list. A confirmation dialog displays.

7. Click **Yes**. The app is permanently deleted from App Manager.

Note that when you permanently delete an app from App Manager, it is removed from your pages and the pages of any user with whom you shared the app. Shared users receive an email indicating that you have deleted the app.

Setting App Options

Centricity2 allows you to modify the default options set for an app that you create. Options for a Document Viewer app are grouped into two categories, General and Sharing. If you have *Social Media Framework* you see a third category, Social Settings.

Here's how you set options for a Document Viewer app.

1. In *Site Manager*, navigate to the workspace containing the app you wish to modify.
2. Click Actions to the right of the page and select *Edit Page* from the drop-down list. The page opens in Edit mode.
3. Click **Options**. The App Options dialog displays.

4. Make changes on each of the tabs as necessary.
5. When finished, click **Save**.

General Tab Options

Use the **General** tab options to change the name of your app as well as add or modify a description for your app. If you add multiple Document Viewer apps on the same page, it might be a good idea to activate the *Show the app name on my page* check box for each of the apps. The App Name then appears as a title and separator for each app on the end-user website.

Use only the default Display Setting of *Display all active app records* for the app. Each Document Viewer app will contain only one record.

Sharing Tab Options

By default, only you have access to an app that you create. If you would like other editors to be able to place your app on their pages, you must share it with them.

The screenshot shows the 'Sharing' tab of the 'Document Viewer App' settings. At the top, the 'App Name' is 'Document Viewer App'. Below are three tabs: 'General', 'Sharing' (selected), and 'Social Settings'. A message states: 'By default, only you can use an app you created. To share this app with others, add specific users or groups.' There are two buttons: 'Assign Group' and 'Assign User'. Below these, a user 'Smith, Joseph' is listed with a 'Remove' button next to it. At the bottom are 'Save' and 'Cancel' buttons.

On the **Sharing** tab, click **Assign Group** or **Assign User** and search for and select specific users and groups with whom you would like to share your app.

Social Settings Tab Options

If you have *Social Media Framework*, you may be able to add social media elements to your app. Whether you can add a particular element depends on which settings and elements your Site Administrator has enabled.

If you have *Social Media Framework*, you can activate *Visitor Commenting* for the app. This allows visitors to comment on your app.

Use the settings on the **Social Settings** tab to apply this social media element to your app. Additional controls may display.

Commenting

Commenting allows visitors to add their comments about your app. Visitors can also reply to comments left by other visitors and reply to comments posted by Community Editors.

The screenshot shows a 'Post a Comment' form. It displays the user's name as 'Joseph Smith' and email as 'jsmith@hvsd.org'. There is a text area for the comment with the text 'Good Practice!' entered. Below the text area is a 'Submit Comment' button. The text area and the submit button are circled in blue.

When you activate the **Commenting** check box, two additional check boxes, two radio buttons and the **Commenting Rights** tab display.

We recommend that you select the **Require Approval** check box. With this activated, you must approve all visitor comments before they display on your website.

If a visitor posts a comment and is not signed in, the name associated with the post is *Anonymous*.

If a visitor posts a comment and is signed into your website, the name and email address of the visitor is pulled from the visitor's user account.

However, if you select the **Allow visitors to change names and email addresses** check box, visitors who are signed in to your website may modify their posting name and email address.

Note that the email address associated with a post never displays on the end-user website.

You may also choose to have newest comments post at the top of the list within your app by selecting the **Show newest comments at the top** radio button. By default the **Show newest comments at the bottom** radio button is selected.

Commenting Rights Tab

When you have enabled **Commenting** for your app, the **Commenting Rights** tab displays. By default, all visitors to your website may comment on your app. If you would like to limit who may comment, click **Assign Group** or **Assign User** and select specific users and groups.

The screenshot shows a web interface for configuring the 'Document Viewer App'. At the top, the 'App Name' is 'Document Viewer App'. Below this are four tabs: 'General', 'Sharing', 'Social Settings', and 'Commenting Rights', with the last one being active. A blue box highlights the 'Assign Group' and 'Assign User' buttons. Below these buttons, a list shows 'HVHS Students' as a 'Group' with a 'Remove' button next to it. At the bottom are 'Save' and 'Cancel' buttons. A close button (X) is in the top right corner.

App Name: Document Viewer App

Document Viewer App Best Practices

Here are some practices to consider when working with a Document Viewer app:

- Insert a document that is a supported file type. The supported file types are DOC(X), XLS(X), PPT(X), PDF and PAGES. The document can be up to 2 MB in size.
- Place one Document Viewer app on a page.
- Insert the Document Viewer app on a page with a one column layout.

Activate the *Show the app name on my page* check box for the Document Viewer App you place on the page. The App Name then serves as a header for the document.

The screenshot shows a web browser displaying a school website. The top navigation bar includes links: Home, About Us, Activities, Alumni, Athletics, Our School, Staffers, Teachers, and Calendar. The main header features the Happy Valley High School logo and the motto: "Show me and I forget. Teach me and I remember. Involve me and I learn." Below the header, a sidebar for "Smith, Anne" lists links: Welcome!, Math Tips and Practice Questions (highlighted), Homework Assignments, Useful Links, and Calendar. The main content area is titled "Math Tips and Practice Questions" and displays a document titled "LINEAR EQUATIONS - Solve for x in the following equations." The document contains seven numbered equations:

1. $x - 4 = 10$
2. $2x - 4 = 10$
3. $5x - 6 = 3x - 8$
4. $2(3x - 7) + 4(3x + 2) = 6(5x + 9) + 3$
5. $2x + 1.8 = 4x - 4.4$
6. $8(x + 5) = 16$
7. $5x - 4 - 2x + 1 = 8x + 2$

The document viewer interface includes a search bar, a page indicator "1 / 1", and a vertical scrollbar on the right side.
